

USE CASE FLOW SPECIFICATION

Name: Aadya Santhosh

SRN: PES1UG24CS005

Section: A

System: Academic Elective Bidding & Allocation System

Use Case Title: Bid for Elective Courses

Primary Actor: Student

Stakeholders / Secondary Actors: Academic Registrar, Database System

Description:

The use case describes the step-by-step interaction where a student logs into the portal, ranks desired elective courses, distributes 100 bidding credits, and submits their final bids while the system verifies prerequisite eligibility and timetable compatibility.

Preconditions:

1. The student is logged in and authenticated on the system portal.
2. The Academic Registrar has set the bidding window to active.
3. The student has an available unallocated credit balance of 100.

Postconditions:

1. The student's bid selections are logged in the database.
2. Total allocated credits equal 100 and a digital submission confirmation receipt is issued.

Main Success Scenario:

1. Student accesses the "Elective Bidding" module.
2. System displays available elective courses alongside prerequisites, schedules, and capacity limits.
3. Student selects the desired electives and orders them by preference.
4. Student allocates the portions of their 100 bidding credits across choices.
5. System checks and verifies prerequisite completions for selected courses.
6. System checks for timetable overlaps across chosen electives.
7. System verifies the sum of allocated credits equals exactly 100.
8. Student clicks "Submit Bids".
9. System writes the bid preferences to the database.
10. System presents a submission receipt to the student.

Alternate Flow:

5a. Unmet Prerequisite Course

- 5a1. System flags the elective requiring missing prerequisites.
- 5a2. System displays an error stating prerequisite requirements are not satisfied and blocks submission.
- 5a3. Student replaces the course with an eligible elective.
- 5a4. System validates the new selection and returns to Step 5 of the main flow.

6a. Timetable Schedule Collision

- 6a1. System highlights the overlapping elective courses.
- 6a2. System displays a schedule conflict warning and disables the "Submit Bids" button.
- 6a3. Student selects a different course slot or replaces one of the conflicting electives.
- 6a4. System verifies the updated schedule is clear and resumes at Step 7 of the main flow.
